

Maxi Post Scratch Brush

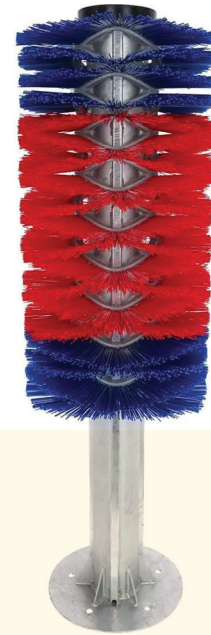

Simultaneous scratching for multiple animals. Hygienic design minimizes dust and insects. Hot-dip galvanized for year-round resilience. 19 replaceable brush rings for extended life. Redirects destructive scratching

Introducing the **Maxi Post Scratch Brush**, the ultimate solution for outdoor scratching satisfaction. Whether installed on concrete or earth, this brush provides cows and horses the joy of a satisfying scratch. Designed for open spaces, **the Maxi Post** allows multiple animals to access the brush simultaneously, making it an ideal time filler while reducing stress and promoting well-being.

By offering a **dedicated and hygienic solution**, the Maxi Post minimizes dust and insects typically found in traditional scratching spots like hedges and trees. This cleaner environment leads to a healthier and more content herd, with happy cows translating into increased production.

Built **for durability**, the **hot-dip galvanized metal structure** ensures year-round resilience in even the toughest outdoor conditions. The high-quality bristles offer effective cleaning while withstanding the elements, ensuring long-lasting performance.

The **19 replaceable individual brush rings** set the Maxi Post apart, allowing for cost-effective maintenance by replacing only the worn sections.
